Summer Intern Job Description

Job Title: Summer Intern

Location: M.J. Bradley & Associates, Washington, D.C.

Contact: dcintern@mjbradley.com

Job Responsibilities: The position involves supporting ongoing initiatives with private sector clients, primarily in the electric generating sector, and environmental organizations. Topics include, assessing state, regional and federal environmental regulatory and legislative initiatives on air pollution control and health impacts, global climate change, market-based regulation, and renewable energy. The work includes significant research and writing, quantitative analysis of regulatory and legislative initiatives using databases and spreadsheets, and the design of graphic elements (e.g., charts and tables) for reports and presentations. In addition, the successful candidate will attend and summarize briefings, forums, and policy meetings in Washington, D.C. on air quality and climate change issues for use by staff and clients. The candidate will be part of a multidisciplinary team with expertise in economics, law, engineering and policy.

Skill Prerequisites: The ideal candidate would be a graduate student or rising senior undergrad with experience working on Capitol Hill or on energy and environmental policy issues. The candidate should have an outstanding academic record; excellent organizational, interpersonal communication and writing skills; strong quantitative and computer skills; and familiarity with air pollution, climate change, and/or energy issues.

Salary: This is a paid position.

Interested candidates should submit a cover letter and resume to the contact above. Candidates receiving further consideration will be required to submit references and writing sample.

About M.J. Bradley & Associates LLC: M.J.
